- University of Southern Denmark
- The Danish National Centre for Social Research

Supported by

- The Ministry of Science, Innovation and Higher Education
- Nordic Sociological Association

Suggested 2018 ISA Congress theme

The Social Formations of Tomorrow – Between Market, State and Civil Society

What can we learn from each other

Vast experience of the Danish LOC

- ESA RN 16 midterm conference: Challenges for health and healthcare in Europe 2012
- Danish Sociology Conference 2000, 2003, 2005 and annually since 2010
- The Sociology of Risk – Theoretical Perspectives 2011
- Norbert Elias and Figural Sociology: Prospects for the Future 2011
- The Social Pathologies of Contemporary Civilization 2010
- International Industrial Relations Association (IIRA) European Congress 2010
- International Conference for alcohol researchers 2009
- Beyond Bourdieu - Habitus, Capital & Social Stratification 2009
- Conference on Prostitution 2008
- Congress of the Nordic Sociological Association 2008, 1997 and 1989

A growing congress

- Göteborg had the highest number of attendees to date - we will learn from their experience to ensure further growth of the congress.
- We expect a high number of delegates from the Scandinavian and Nordic organisations.
- The European market is growing fast. Within the last ten years the European congress ESA has grown from 700 delegates to 2800 delegates. We will focus heavily on the potential of this market.

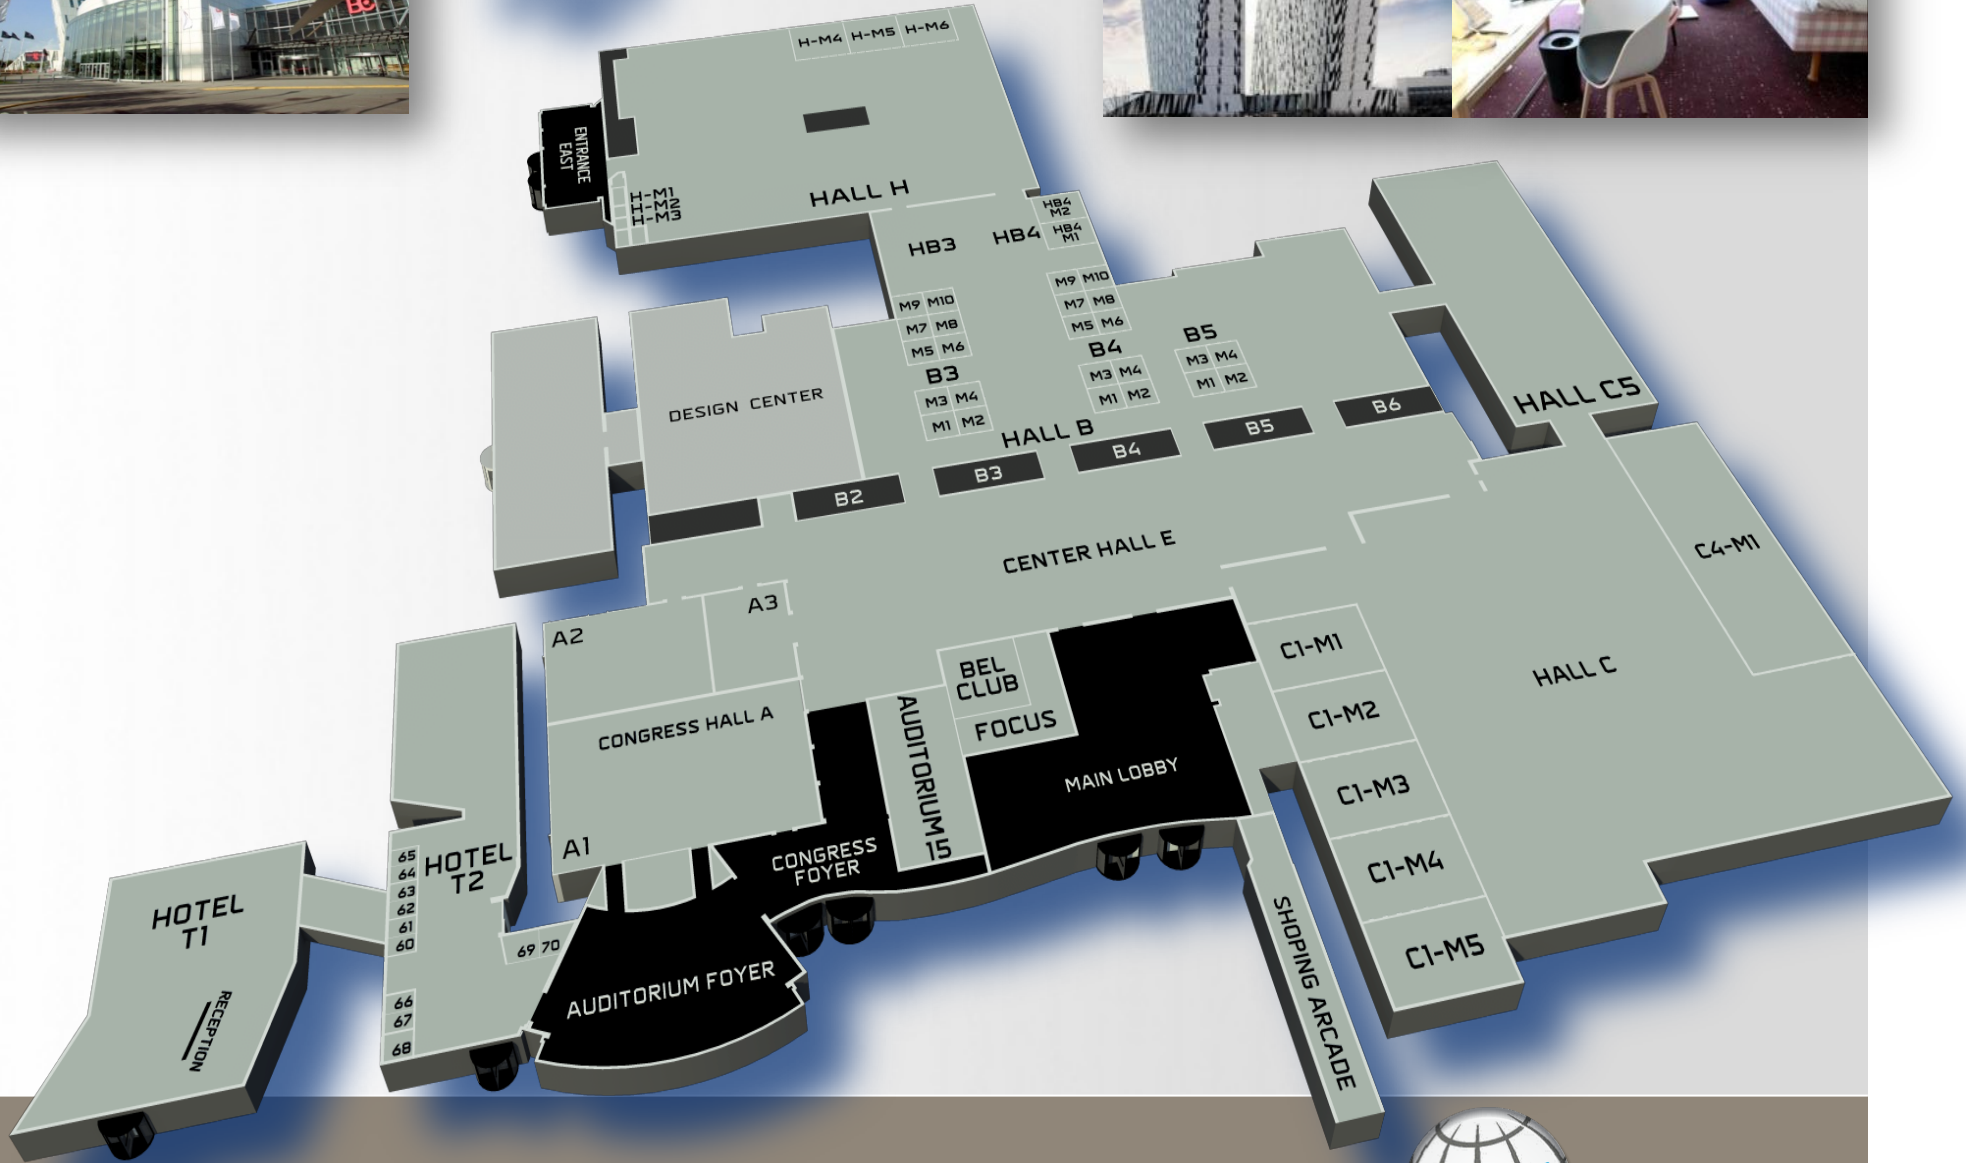

Our track record shows that congresses grow when held in Copenhagen:

- European Respiratory Society had an increase of 13,5%
- SIBOS had an increase of 20%
- Microsoft Convergence had an increase of 21%

Bella Center Copenhagen Bella Sky Hotel
